

They grow up so fast.

Now's your chance to shape their future.

A kindergartener counted in the 2020 Census this spring will be starting high school when the next census comes around in 2030: That's 10 years of school supplies, teachers, school lunches, and so much more. This is your opportunity to help ensure they have a bright future.

Right now, students across the country are getting an introduction to the 2020 Census through the Statistics in Schools program. This program offers free activities and resources to schools to help prepare their students for an increasingly data-driven world.

Students are learning that the 2020 Census is a count of every person who lives in the United States and its territories. Responding to the census helps your community get its fair share of funding. Census data guides how more than \$675 billion in federal funding is distributed to states and communities each year for schools, health care facilities, roads, transportation, recreation centers, social services, and more.

Students are also learning these key things about the 2020 Census—and we want you to know them too:

- Starting in March 2020, everyone living in your home needs to be counted. That includes children and newborn babies, citizens and noncitizens, relatives and nonrelatives, and even those staying with you temporarily.
- It's easier than ever to respond to the census. You can respond in 13 different languages, and you can complete it online, by phone, or by mail.
- Your responses to the census are safe and secure. The law requires the U.S. Census Bureau to keep your information confidential, and your responses cannot be used against you in any way.

You have the power to shape your future, and the future of all children, by counting everyone in your home in the 2020 Census.

Los niños crecen tan rápido.

Ahora es su oportunidad para darle forma a su futuro.

Un niño de kínder que se cuente en el Censo del 2020 estará comenzando la escuela secundaria cuando llegue el próximo censo en el 2030. Eso equivale a 10 años de artículos escolares, maestros, almuerzos escolares y mucho más. Esta es su oportunidad de ayudar a garantizar que los niños tengan un futuro brillante.

En este momento, los estudiantes a través de todo el país están aprendiendo sobre el Censo del 2020 por medio del programa Estadísticas en las Escuelas. Este programa ofrece materiales y recursos gratuitos a las escuelas para ayudar a preparar a los estudiantes a vivir en un mundo cada vez más orientado a los datos.

Los estudiantes están aprendiendo que el Censo del 2020 es el conteo de todas las personas que viven en los Estados Unidos y en sus territorios. Responder al formulario del censo ayuda a que su comunidad reciba los fondos que necesita. Los resultados del censo ayudan a determinar como más de \$675 mil millones en fondos federales se distribuyen cada año a los estados y comunidades para escuelas, clínicas de salud y hospitales, carreteras, transporte público, centros de recreación, servicios sociales y más.

Aprenda más sobre cómo puede ayudar a darle forma a su futuro en 2020CENSUS.GOV/ES. Obtenga más información sobre el programa de Estadísticas en las Escuelas en CENSUS.GOV/SCHOOLS.
